## The future of IoT is very exciting.

More and more companies are seeing the benefits of IoT and choosing to do more with it. Almost every adopter says their projects are delivering results, and over half say the benefits are significant. These benefits range from cost reductions to improved safety; from increased responsiveness to entirely new revenue streams.

## Use Cases

- Security company – Multinet IoT SIMs in CCTV cameras
- Farm machinery company – Multinet IoT SIMs in tractors
- Haulage company – Multinet IoT SIMs in dash-cams
- Electric gates company – Multinet IoT SIMs in control panels
- Delivery company – Multinet IoT SIMs in drivers PDA's

“ Hear a real-life example from one of our customers:

As a delivery company it's critical our driver's PDA's are always "online" to enable them to receive new jobs, update existing jobs, we know their location and they can find the quickest route to their next job. We had previously used single network IoT SIM's which meant the drivers kept going "offline" when in areas of poor coverage, since moving to Multinet IoT SIMs our drivers are now "online" 100% of the type which meant a huge increase in their productivity.
